

- static route on 5022
1. To enter a static route on either 5022 type IP at the initial prompt and the similar prompt will appear.  
trenholm5022/ip>
  2. Type the following command using the desired ip address for x.x.x.x and desired gateway for y.y.y.y  
static-route x.x.x.x 255.255.255.255 1 y.y.y.y create
  3. Enter to dots to back up a prompt as shown  
..  
trenholm5022>
  4. The next is to add the route to the desired VLAN. Type the desired Vlan by typing:  
vlan 301  
A similar screen will appear.  
trenholm5022/vlan303>
  5. Type the following command using the desired ip address from step 2  
ip x.x.x.x mask 255.255.255.0 create

The x.x.x.x will be forwarded to the selected gateway on the switch steps 1-5 were entered.
